Customers shall not be entitled to a further option of changing to another tariff until a period of twelve months has elapsed from a previous exercise of option. However, a retail entity at the request of a customer may permit a change to another tariff within a period of twelve months if –

- (i) a tariff that was not previously in force is offered and such tariff is applicable to the customer's installation; or
- (ii) the customer meets certain costs associated with changing to another tariff.

Customers previously supplied under tariffs which have now been discontinued or redesignated (whether by number, letter or name) will be supplied under other tariffs appropriate to their installations.

Tariffs are generally determined on a monthly billing basis.

All accounts for electricity supplied, as calculated in accordance with the provisions of a determination applicable thereto, or such accounts for electricity supplied, as varied by other amounts payable to or by the retail entity, which are for an amount which is not a whole number multiple of five cents, shall be reduced to the amount next closest thereto which is a whole number multiple of five cents.

**Pro-Rating Procedure****(a) Following a tariff variation**

For customers subject to the prices and methods of charge set out in Parts 1, 3, 4 and 6, electricity consumed between the meter reading on or next before the date of a variation to the relevant tariff and the meter reading next after such variation date shall be deemed to have been used at a uniform daily rate.

For customers subject to the prices and methods of charge set out in Part 2, electricity consumed between the billing date on or next before the date of a variation to the relevant tariff and the billing date next after such variation date shall be deemed to have been used at a uniform daily rate.

Where the retail entity renders an account in respect of a billing period during which a single variation in tariffs has occurred, the charges for electricity shall be calculated as if the rates of charges for electricity supplied for the whole of the billing period were at the rates applicable after the variation takes effect and adjusting the charges for electricity so calculated as follows:-

If the amount of adjustment is positive it shall be subtracted from the charges for electricity as calculated. If the amount of adjustment is negative it shall be added to the charges for electricity as calculated.

The amount of adjustment shall be calculated as follows:

$$A = \frac{d}{n} (N - C)$$

Where	A	is the amount of the adjustment;
	d	is the number equal to the number of days in the billing period which occur in the period commencing on the date of commencement of the billing period and ending on the day immediately before the variation takes effect;
	n	is the number equal to the number of days occurring in the billing period;
	N	is the amount calculated as if the rates of charges for electricity for the whole of the billing period were at the rates which applied after the variation takes effect;
	C	is the amount calculated as if the rates of charges for electricity for the whole of the billing period were at the rates which applied immediately before the variation takes effect.

#### (b) Daily pro-rating

Daily pro-rating shall apply to electricity billing. The charges for electricity shall be calculated *pro rata* having regard to the relationship of the number of days covered by the account and one-twelfth of three hundred and sixty-five days. The calculation of electricity charges shall be effected by way of an adjustment to the tariff provisions included in this determination. The adjusted provisions shall be calculated as follows:

$$P_a = \frac{P \times 12 \times n}{365} \quad \text{for monthly provisions}$$

and

$$P_a = \frac{P \times n}{365} \quad \text{for annual provisions}$$

Where  $P_a$  is the adjusted provision;

$P$  includes the monthly provisions of the number of kilowatt hours in the blocks of tariffs, Service Fees, Minimum Payments, minimum consumption at "other times" of Tariffs 23 and 63, demand charges and wattage charges and includes the annual charges for motor capacity and Public Lamps;

$n$  is the number equal to the number of days occurring in the billing period.

### Supply Voltage

#### (a) Low Voltage

Except where otherwise stated, the tariffs in Part 1 hereof will apply to supply taken at low voltage (480/240 volts or 415/240 volts, 50 Hertz A.C. as required by the retail entity).

#### (b) High Voltage

##### (i) Customer plant requirements.

Supply may be given and metered at a standard high voltage, the level of which shall be prescribed by the retail entity, by agreement between the customer and the retail entity. Where high voltage supply is so given, a customer shall supply and maintain all equipment including transformers and high voltage automatic circuit breakers but excepting meters and control apparatus beyond the customer's terminals.

##### (ii) Credits where L.V. tariff is metered at H.V.

Where supply is given in accordance with (i) above and metered at high voltage then, except in cases where high voltage tariffs are determined or provided by agreement to meet special circumstances, the tariffs applied will be those pertaining to supply at low voltage ("the relevant tariff"), EXCEPT THAT, after billing the energy and demand components of the tariff, a credit will be allowed of –

- 5 per cent of the calculated tariff charge where supply is given at voltages of 11kV to 33 kV; and
- 8 per cent of the calculated tariff charge where supply is given at voltages of 66 kV and above,

(provided that the calculated tariff charge after application of the credit must not be less than the Minimum Payment or other minimum charge calculated by applying the provisions of the relevant tariff.)

The Service Fee applicable to all high voltage supply given at Tariffs 20, 22, 41 and 43 shall be **\$74.55** and shall be applied after the application of the High Voltage credit.

**(iii) Discounts where customer meets certain system costs**

Where high voltage customers with recorded maximum demands in excess of 1000 kilowatts meet certain costs of providing supply from the Powerlink Queensland connection point nearest to their installations, a discount of up to 9% may be applicable to the energy and demand charges otherwise assessed at the tariffs herein.

Upon written application by the customer the retail entity will evaluate the level of discount appropriate to the installation in question and will negotiate an agreement with the customer which will take effect from the date of written application.

**Card-operated Meters in Remote Communities**

If a customer is in a remote community and is either a domestic customer or a commercial customer with an estimated consumption of less than 10,000 kilowatt hours per month, the retail entity may agree with the customer, or the relevant remote community Council on behalf of the customer, to measure and charge for the electricity consumed by the customer by means of a card-operated meter. The methodology for applying the appropriate tariffs to customers subject to card-operated meters is as follows:

- (a) If electricity supplied to a domestic customer is measured and charged by means of a card-operated meter:
- (i) for Tariff 11 (Domestic – Lighting, Power and Continuous Water Heating), all consumption shall be charged at the 'All Consumption' rate (**12.27 cents/kWh**), plus a Service Fee of **\$1.08** per week shall apply;
  - (ii) for Tariff 31 (Night Rate – Super Economy), all consumption shall be charged at the 'All Consumption' rate (**5.01 cents/kWh**), with no Minimum Payment; and
  - (iii) for Tariff 33 (Controlled Supply – Economy), all consumption shall be charged at the 'All Consumption' rate (**7.37 cents/kWh**), with no Minimum Payment.
- (b) If electricity supplied to a commercial customer is measured and charged by means of a card-operated meter, all consumption shall be charged at the 'All Consumption' rate under Tariff 20 (General Supply) (**13.75 cents/kWh**), plus a Service Fee of **\$1.96** per week shall apply.

**Part 4**

**CONCESSIONAL APPLICATIONS OF TARIFF 11 (DOMESTIC)**

**Tariff 11 – Domestic (Lighting, Power and Continuous Water Heating) – is available to:**

**A. - Those separately metered installations where all electricity consumed is used in connection with the provision of a Meals on Wheels service or for the preparation and serving of meals to the needy and for no other purpose.**

**B. - Charitable residential institutions which comply with all the following requirements:-**

(a) Domestic Residential in Nature

The total installation, or that part supplied and separately metered, must be domestic residential (i.e. it must include the electricity usage of the cooking, eating, sleeping and bathing areas which are associated with the residential usage).

Medical facilities, e.g. an infirmary, which is part of the complex may be included as part of the total installation.

and

(b) Charitable

An eligible organisation is a public benevolent institution as defined under section 78(4) of the *Income Tax Assessment Act 1936* to which donations of \$2 and upwards are tax deductible.

In addition, it must be a non-profit organisation that:

- (i) imposes no scheduled charge on the residents for the services or accommodation that is provided (i.e. organisations that provide emergency accommodation facilities for the needy); or
- (ii) if scheduled charges are made for the services or accommodation provided, then all residents must be pensioners or, if not pensioners, persons eligible for subsidised care under the *Aged or Disabled Persons Care Act 1954*, the *National Health Act 1953* or the *Nursing Homes Assistance Act 1974*.

**C. - Organisations providing support and crisis accommodation which comply with the following requirements:-**

An organisation which:

- (i) meets the eligibility criteria of the Supported Accommodation Assistance Program (SAAP) administered by the State Department of Communities and is therefore eligible to be considered for funding under this program. (Funding provided to organisations under SAAP is subject to Part 3, Sections 10 to 13 inclusive, of the *Family Services Act 1987*.);

and

- (ii) is a public benevolent institution as defined under section 78(4) of the *Income Tax Assessment Act 1936* to which donations of \$2 and upwards are tax deductible.

## Part 5

QUEENSLAND GOVERNMENT ELECTRICITY  
REBATE

1. A Queensland Government Electricity Rebate is available to customers provided the customer:
  - (a) holds a current and valid card of the following type –
    - (i) Pensioner Concession Card, issued by either Centrelink or the Department of Veterans' Affairs; or
    - (ii) Repatriation Health Card for All Conditions (Gold Card) and is in receipt of one of the following payments:
      - (A) War Widow (including Widowed Mother [AMS] Pension); or
      - (B) Special Rate T.P.I. (including Blinded Disability) Pension; or
    - (iii) Queensland Government Seniors Card; and
  - (b) is a registered customer of a retail entity at the premises for which the rebate is claimed and the premises is the customer's principal place of residence, and the only residence in Queensland for which the customer claims the rebate; and
  - (c) lives alone or shares the premises in respect of which the rebate is claimed with:
    - (i) the customer's spouse; or
    - (ii) other persons who hold a current and valid card of the type described in paragraph (a) above; or
    - (iii) other persons wholly dependent on the customer; or
    - (iv) other persons who receive an income support payment from Centrelink, Family Assistance Office or Department of Veterans' Affairs and who do not pay rent; or
    - (v) other persons who live with the customer to provide care and assistance and who do not pay rent; and

declares that no other person(s) except casual visitors share the residence with the customer; and
  - (d) makes application for a rebate either by submitting the relevant form or, at the discretion of the retail entity, by telephone and the application is received and accepted at an office of a retail entity at least fourteen (14) days prior to the next billing period.
2. Where an electricity account is in more than one name, and more than one resident is eligible to receive the rebate, each resident may have their eligibility established. However, only one rebate per household will be paid.
3. The retail entity may, at any time, require a new application from a customer and if the customer fails to lodge such form within the time specified by the retail entity the rebate shall cease.
4. A Queensland Government Electricity Rebate is also applicable to the electricity account of residential home parks and other similar multi-tenanted residential premises provided the following sub-conditions are met:
  - (a) the customer (ie. the owner or operator of the multi-tenanted residential premises) of the retail entity at the premises concerned –
    - (i) supplies electricity to each of the separately identifiable vans, flats or home units, or other similar living units at the premises; and
    - (ii) charges for electricity on the basis of metered consumption; and
    - (iii) is claiming the rebate on behalf of eligible persons residing at the premises ("claimant residents"); and
    - (iv) will fully pass on the rebate to claimant residents by way of a reduction in charges for electricity; and
  - (b) each separately identifiable living unit for which the rebate is claimed is occupied by persons who, if they had been supplied directly by the retail entity, would have been eligible for the electricity rebate; and
  - (c) a rebate is applicable only to claimant residents for the full period of each electricity account being paid; and
  - (d) a completed rebate application form must be produced with the customer's electricity account at the time payment is tendered.
5. The rebate is **\$9.57** (GST exclusive) per billing month applied against the dollar and cents value of the electricity consumed based on the applicable (GST exclusive) Tariffs. In no instance shall the rebate paid be greater than the amount billed (excluding GST) for electricity consumed (based on consumption) in a period for which the rebate is claimed.
6. The process for application of the rebate is best illustrated by an example where the dollar and cents value of the electricity consumed is \$100.00 in a billing month. Therefore the bill rendered by the retail entity will be \$110.00 (\$100.00 plus GST of \$10.00) less \$10.53 (\$9.57 plus GST of \$0.96). That is the bill will be \$99.47.

## Part 6

### RELIEF FROM ELECTRICITY CHARGES WHERE DROUGHT DECLARATION IN FORCE

A customer who is a farmer in a drought declared area or whose property is individually drought declared under Queensland Government administrative processes is eligible for the following forms of relief from electricity charges:

#### (A) Tariff 68 – Irrigation Pumping in Drought Declared Area

A customer who is a farmer in a drought declared area or whose property is individually drought declared may transfer individually metered irrigation pumping loads to this tariff until the drought declaration is revoked: Provided that, if water pumping time restrictions continue to apply after the drought declaration is revoked, the customer may remain on this tariff until the water pumping time restrictions are lifted or until 12 months after the revocation of the drought declaration, whichever is the earlier.

All consumption                      **11.27 c/kWh**

The conditions set out in Part 3, applicable to customers changing from one tariff to another, do not apply in the case of a customer who transfers individually metered irrigation pumping loads to or from this Tariff 68.

#### (B) Waiving of Fixed Charge Components of Electricity Charges

If a customer who is a farmer in a drought declared area or whose property is individually drought declared has no water to pump, the fixed components of the customer's electricity charges shall be waived. These fixed charge components include minimum payments, service fees, annual fixed charges under Tariff 66 and guarantee agreement shortfall charges.

Provided the drought declaration remains operative, the waiver applies to all fixed charges applicable to any account covering the period in which pumping ceased and to any subsequent account until the customer once again has water to pump. If the operative drought declaration is revoked before the customer once again has water to pump, the waiver shall continue to apply until water is available or until 12 months after the revocation of the drought declaration, whichever is the earlier.

#### (C) Deferral of Payment

If a customer who is a farmer in a drought declared area or whose property is individually drought declared cites financial difficulties as a result of the drought, the customer is entitled to defer payment of the customer's electricity accounts relating to farm consumption.

The retail entity may charge interest on deferred accounts. However, the rate of any interest charged must not be more than the Bank Bill reference rate for 90 days, as published on the first business day of each quarter.

Subject to the maximum rate of interest that may be charged, the terms of the deferred payment and the repayment of deferred amounts following revocation of the drought declaration will be as agreed between the retail entity and the customer concerned.

#### Eligibility for Relief

A customer seeking relief from electricity charges, including a transfer of irrigation pumping loads to Tariff 68, on the basis that the customer is a farmer who is in a drought declared area or whose property is individually drought declared, must apply in writing to the retail entity.

If required by the retail entity, the customer must provide:

- (a) evidence that the customer's property is in a drought declared area or is individually drought declared, including the effective date of such drought declaration;
- (b) evidence of the water pumping restrictions applicable to the customer's property; and
- (c) evidence that the customer is experiencing financial difficulties as a result of the drought.
