

I [REDACTED] enter this submission about the draconian Vlad laws that have been wrongly introduced under false pretence by the former Newman LNP government. These draconian laws have had adverse effects on my human rights. As a taxpaying citizen without any criminal convictions I am no longer allowed to associate with whomever I choose in public or can enter licensed premises with more than one associate. This being said I can no longer celebrate birthdays, anniversary's, or even have the right to attend the funeral services of friends and loved ones under these laws which were forced through parliament by a megalomaniac with some form of personal agenda that was not in the best interest of Queenslanders. The trumped up statistics which have proven to be falsified by the Queensland police services own statistics clearly show that these laws have been not only a burden to Queensland financially through a massive police operation exhausting millions of dollars in tax payers money but have also compromised hard working tax paying peoples livelihood's .
