Find, view, download and connect with our data

Queensland Globe

An online interactive mapping tool. Access high resolution satellite imagery and hundreds of spatial data layers. Create, save and share maps with your customers and colleagues.

Visit qldglobe.information.qld.gov.au

QImagery

An online aerial photograph library, allowing you to search for images by location. You can access and download more than 800,000 historical aerial photographs of Queensland from the 1930's to 2012.

Visit qimagery.information.qld.gov.au

Queensland Geocoder

Transform a physical address into geographical coordinates and vice-versa. Use the Geocoder to find a lot on plan of a Queensland address and locate the longitude and latitude of an address or lot on plan.

Visit geocode.information.qld.gov.au

QSpatial

Access spatial data including downloadable datasets, pre-packaged datasets, live data and maps, spatially related applications. Visit qldspatial.information.qld.gov.au

QTopo

View and explore Queensland's topographic data and generate richly detailed maps.

Visit qtopo.information.qld.gov.au

Spatial Portal

Provides access to a variety of spatial web services.

Visit spatial.information.qld.gov.au/arcgis/home
