

White passion flower

Passiflora subpeltata

White passion flower is a native of Brazil, and one of three South American passion fruit vines that have become invasive plants in Queensland.

White passion flower invades forest edges, roadside vegetation and disturbed sites, including vegetated areas in grazing land. It is capable of growing over other vegetation, effectively smothering native shrubs and trees.

It contains cyanic acid and is suspected to be toxic to humans and livestock if eaten in sufficient quantities.

Legal requirements

White passion flower is not a prohibited or restricted invasive plant under the *Biosecurity Act 2014*. However, by law, everyone has a general biosecurity obligation (GBO) to take reasonable and practical measures to minimise the biosecurity risks associated with invasive plants under their control.

Local governments must have a biosecurity plan that covers invasive plants in their area. This plan may include actions to be taken on white passion flower. Some of these actions may be required under local laws. Contact your local government for more information.

**Queensland
Government**

Description

White passion flower is a thin stemmed, climbing vine with broad, pale green three-lobed leaves. The leaves are hairless, and tendrils grow from the vine beneath each leaf. The vine bears large white flowers and smooth oval shaped fruits that remain a bluish green. They do not 'ripen' like edible passion fruit varieties.

Control

Isolated vines can be hand pulled or grubbed out, as long as the whole crown is removed from the soil. Hand pull only when the soil is moist.

Herbicide control

There are no herbicide products specifically registered for the control of white passion flower in Queensland. However, a permit allows people generally to use some herbicide products to control white passion flower as an invasive plant in various situations.

See Table 1 for the treatment options in situations allowed by the permit.

Prior to using the herbicides listed under this permit (PER11463) you must read or have read to you and understand the conditions of the permit. To obtain a copy of this permit visit apvma.gov.au.

More information

More information is available from your local government office or visit biosecurity.qld.gov.au.

Table 1. Herbicides for the control of white passion flower

Situation	Herbicide	Rate	Registration details	Comments
Non-agricultural areas, domestic and public service areas, commercial and industrial areas, bushland/native forests, roadsides, rights-of-way, vacant lots, wastelands, wetlands, dunal and coastal areas	Glyphosate 360 g/L and other formulations (many trade names)	1 part product to 2 parts water For other formulations consult label or the PER11463	APVMA permit PER11463 (permit expires 30/04/2027)	Cut stump to less than 10 cm above the ground
	Triclopyr 200 g/L + Picloram 100 g/L (e.g. Apparent Slogger) or Triclopyr 200 g/L + Picloram 100 g/L + aminopyralid 25 g/L (Tordon RegrowthMaster)	50 mL per 1 L water		Cut stump to less than 10 cm above the ground
	Triclopyr 240 g/L + Picloram 120 g/L (e.g. Access)	250 mL per 15 L in diesel or other suitable carrier as per product label general instructions		Cut stump or basal bark
	Triclopyr 300 g/L + Picloram 100 g/L (e.g. Conqueror) or Triclopyr 300 g/L + Picloram 100 g/L + aminopyralid 8 g/L (e.g. Grazon Extra)	75 mL/15 L water		Spot spray Can be used where no germinating broadleaf desirables are expected within six months

Read the label carefully before use. Always use the herbicide in accordance with the directions on the label.

Fact sheets are available from biosecurity.qld.gov.au. The control methods recommended should be used in accordance with the restrictions (federal and state legislation, and local government laws) directly or indirectly related to each control method. These restrictions may prevent the use of one or more of the methods referred to, depending on individual circumstances. While every care is taken to ensure the accuracy of this information, the department does not invite reliance upon it, nor accept responsibility for any loss or damage caused by actions based on it.
