

# Example of Workforce Level Classifications

Identifying the workforce levels relevant to your organisation could be challenging as there may be diversity across roles and responsibilities.

Understanding how employees fit into the workforce levels of the Framework necessitates careful consideration of these differences and your workforce may be represented across all levels with differing learning objectives. Identifying the relevant level is about appreciating the varied nature of roles, the level of contact with people directly impacted by DFV or exposure to DFV in a policy

or program development capacity and tailoring the training approach accordingly—acknowledging that one approach may not fit all.

Below are some examples of different roles and how they may fit within the workforce levels.

Example workforce level classifications		
All Roles	Mainstream and Non-DFV Specialist Service Roles	Specialist DFV Service Roles
