

Fee and reporting requirements for operator of a workover rig that performs well completion or maintenance work

Overview

Section 155 of the Petroleum and Gas (Safety) Regulation 2018 (P&G Regulation) makes liable the operator of a workover (or well servicing) rig that performs maintenance or well completion for a petroleum well, geothermal well, greenhouse gas (GHG) well or UCG well. This is Category 2 of the petroleum and gas safety and health fee (the fee).

Section 158 of the P&G Regulation requires workover (or well servicing) operators to report total number of petroleum wells, geothermal wells, GHG wells or UCG wells for which completion or maintenance work was performed by the person.

Under section 157 of the P&G Regulation workover (or well servicing) operators must lodge a **petroleum and gas safety and health fee return for each financial year by 31 July**.

The annual fee payable by workover (or well servicing) operators helps fund the activities of the Petroleum & Gas Inspectorate, Resources Safety and Health Queensland in regulating and promoting safety for businesses and the community.

What operating plants are subject to this fee?

A facility used to explore for, produce or process petroleum, including machinery used for completing, maintaining, repairing or converting a petroleum well e.g. workover or well servicing rig.

What operating plants are not subject to this fee?

1. Ancillary equipment used by a workover or well servicing rig not integral to the rig itself such as water trucks (usually provided by a third party contractor) including all its constituent parts such as pumps, pressure control equipment, pipes and storage vessels when setting up, operating and pulling down at a site.
2. Workover (or well servicing rig) used to decommission (plug and abandon) a petroleum well.

When do you need to pay the fee as the operator of a drilling rig?

You will be required to pay the fee for total number of wells where you are the operator in the reporting period. The fee is an annual invoice and will be issued to you on or before 10 November after the end of the financial year.

Payment terms are detailed on the invoice. Interest and late penalties apply for late payment of invoices.

What is the reporting period?

The reporting periods are broken up into financial years (1 July to 30 June). If you are the operator of a workover rig that was used at any time during the financial year you are liable to pay the fee.

More information
