Type of community infrastructure for which the land has been designated

The type of community infrastructure for which the land has been designated is operating works under the *Electricity Act 1994*. Specifically, these operating works are ENERGEX Limited's 110 kilovolt sub-transmission line from Powerlink Queensland's Loganlea Substation to ENERGEX Limited's Jimboomba Substation and connection of the line into the Loganlea, Kingston and Jimboomba Substations.

Requirements imposed on the designation

The following requirements have been imposed on the designation pursuant to section 202 of the *Sustainable Planning Act 2009*, including requirements designed to lessen the impacts and environmental aspects of the works.

In relation to the Logan River section of the project:

1. clearing of remnant vegetation is to be kept to a minimum;
2. where possible, large trees in close proximity to the Logan River should be pruned rather than removed;
3. a riverbank protection strategy must be developed and implemented for sections of the riverbank where structures are located;
4. appropriate revegetation and landscaping must be undertaken to minimise environmental impacts around structures;
5. the design of poles and any associated works must include measures to minimise the impact on visual amenity. For example, green poles or shadowline conductor; and
6. in cooperation with Logan City Council, like-for-like vegetation offsets are to be undertaken within the Logan City Council area.
