

## Translation & Implementation Plan

Project title:	
Output <i>Intervention / innovation / information</i>	<i>Will it be translated into a practice, policy, program, process, website, tool, etc. How will the evidence-informed product be implemented?</i>
Hypothesis and anticipated findings	
Expected benefits in alignment with the research agenda. <i>e.g., practice improvement</i>	<i>What will be the outcome of implementation? Who will implementation benefit and how?</i>
End Users	<i>Who will develop and implement research-informed practices, policies, programs, processes? e.g., detention centre caseworkers.</i>

### Engagement strategy

Objective	Format	Channel	Key messages	Communicator	Timing
<i>e.g., share finding to inform/increase knowledge</i>	<i>How will you produce/present the information? This is your 'outputs'</i>	<i>How will you deliver the information to end-user/ audiences?</i>	<i>What are the 3 most important things the end user/audience need to know or remember?</i>	<i>Who would be most influential speaker/presenter for the identified end-user/ audiences?</i>	<i>What is the best year/ month/date/ to share this? Does it coincide with or avoid existing forums/meetings or events?</i>
<i>e.g., implement new clinical practice</i>					
<i>e.g., influence policy change</i>					
<i>e.g., inform development of new NGO program/project</i>
