

16.38 Vessel Interaction Prevention CCF Berths

10 December 2021

Dear Captain

VESSEL INTERACTION PREVENTION CCF Berths

You are currently berthed at the Clinton Coal Facility (CCF), this places your vessel close to the channel used by outbound deep draft vessels departing the WICET coal terminal, or from deep draft vessels departing CCF1 (if you are berthed at CCF2, CCF3 or CCF4).

Whilst every effort will be made to reduce the effects of interaction of passing vessels on your vessel, it is important that you:

1. Follow the direction of Wharf Supervisors at CCF with respect to mooring lines,
2. Ensure your vessel is hard against fenders when a deep draft vessel from WICET or CCF1 is passing, and
3. Maintain a continuous watch on VHF channel 13.

Yours faithfully,

A handwritten signature in blue ink, appearing to read 'John Fallon'.
