# Open Data Release Schedule 2020 - 2021

## Release Schedule

The Department of Local Government, Racing and Multicultural Affairs (the department) is committed to openness, transparency, accountability and active engagement with the community. This schedule underpins the department's Open Data Strategy 2020-2021.

The department's intent is to release information that does not have valid privacy concerns or an information security classification that would prevent its release. The identification of datasets to release will be informed by the ongoing review of the department's operations that generate information, and from public feedback and trends on the use and quality of previously released datasets. This information can then be reused and redistributed to anyone, anytime, and anywhere.

The schedule is summarised into three distinct categories:

- active released datasets – are those that the department will be periodically updating so that the information is freely available to the public through the Queensland Government Open Data Portal
- inactive released datasets – are those that the department will no longer be updating, but the information is still freely available to the public
- closed datasets – are those that the department has determined as not suitable to be published on the Open Data Portal due to privacy, confidentiality or other reasons.

The Open Data Release Schedule will be reviewed and updated on an annual basis.

Queensland Government

| Active released datasets – *will be periodically updated* | | |
|---|---|---|
| **Title** | **Description** | **Update frequency** |
| Customer complaints management | The amount of customer complaints received by the department, the timeliness of the response, substantiated/unsubstantiated and whether further action is required. | Annually |
